**Abstract:** Starting from a brief presentation of some relevant theoretical aspects regarding English collocations in general, the present paper aims at providing a mini-glossary of relevant environment-related terms and of their corresponding collocations with a view to highlight the importance and usefulness of correctly using these collocations in both specialized and general fields of activity such as: environment protection, environment engineering, environmental sciences, environmental organizations, environment magazines, environment newspaper articles, environment issues, a.s.o.

**Keywords:** domain-specific collocations, environment, lexical collocations, pollution, words vs. terms.

**Acknowledgement:** This work was supported by the project "Strategy and actions for preparing the national participation in the DANUBIUS-RI Project" acronym "DANS" financed by the Romanian Ministry of Research and Innovation.
